शिक्षा केवल पुस्तकों तक सीमित ज्ञान नहीं है; यह स्वयं को पहचानने, अपने विचारों को विस्तार देने और जीवन की चुनौतियों का आत्मविश्वास से सामना करने की सतत यात्रा है। केन्द्रीय विद्यालय संगठन का सदैव यह प्रयास रहा है कि प्रत्येक विद्यार्थी के लिए ऐसा शिक्षण वातावरण हो, जहाँ जिज्ञासा को प्रोत्साहन मिले, सीखना आनंददायी बने और प्रत्येक बालक अपनी अंतर्निहित क्षमताओं को पहचानकर उन्हें विकसित कर सके।

राष्ट्रीय शिक्षा नीति 2020 ने शिक्षा को सिर्फ रटने से समझने, सूचना से ज्ञान और ज्ञान से जीवनोपयोगी दक्षताओं की ओर अग्रसर किया है। आज का समय कृत्रिम बुद्धिमत्ता (Artificial Intelligence – AI), डिजिटल नवाचार और निरंतर बदलती तकनीकों का है। ऐसे युग में केवल तथ्यों का ज्ञान पर्याप्त नहीं है; आवश्यक है कि विद्यार्थी मनन-चिंतन करना सीखें, प्रश्न पूछें, समस्याओं का समाधान खोजें और नए विचारों के साथ आगे बढ़ें। यही क्षमताएँ उन्हें भविष्य के लिए तैयार करेंगी।

इन्हीं उद्देश्यों को ध्यान में रखते हुए केन्द्रीय विद्यालय संगठन के पाँचों आंचलिक शिक्षा एवं प्रशिक्षण संस्थानों (ZIETs) के माध्यम से, समर्पित एवं अनुभवी शिक्षकों द्वारा कक्षा 9 से 12 के विद्यार्थियों के लिए यह विद्यार्थी सहायक सामग्री तैयार की गई है। यह केवल परीक्षा की तैयारी की संकलन सामग्री नहीं है, बल्कि विषयों को सरलता से समझने, अवधारणाओं को स्पष्ट करने, नियमित अभ्यास करने और आत्मविश्वास के साथ आगे बढ़ने का एक विश्वसनीय साथी है।

इस सामग्री में विषय-वस्तु को विद्यार्थियों की आवश्यकताओं के अनुरूप सरल, व्यवस्थित एवं दक्षता-आधारित दृष्टिकोण से प्रस्तुत किया गया है। मुझे प्रसन्नता है कि इसे हमारे शिक्षकों के अनुभव, नवाचार और विद्यार्थियों के प्रति उनकी प्रतिबद्धता ने समृद्ध बनाया है। मुझे विश्वास है कि यह सामग्री विद्यार्थियों की सीखने की यात्रा को अधिक सहज, रोचक और प्रभावी बनाएगी तथा उन्हें बोर्ड परीक्षाओं के साथ-साथ जीवन की व्यापक चुनौतियों के लिए भी तैयार करेगी।

मेरा विश्वास है कि जब एक जिज्ञासु विद्यार्थी, प्रेरित शिक्षक और सार्थक शिक्षण संसाधन एक साथ आते हैं, तब शिक्षा केवल उपलब्धि का माध्यम नहीं रहती, बल्कि व्यक्तित्व निर्माण की एक सशक्त प्रक्रिया बन जाती है। यही भावना इस विद्यार्थी सहायक सामग्री के केंद्र में है।

मेरी हार्दिक शुभकामनाएँ हैं कि आप सभी सीखने की इस यात्रा में निरंतर आगे बढ़ें, अपने सपनों को नए आयाम दें और ज्ञान, संवेदनशीलता तथा नवाचार के साथ राष्ट्र निर्माण में अपना महत्वपूर्ण योगदान दें।

शुभकामनाओं सहित।

PART-I: ACCOUNTING FOR PARTNERSHIP FIRMS

CH-01: ACCOUNTING FOR PARTNERSHIP – BASIC CONCEPTS

Meaning: Partnership is an association between two or more persons who agree to do business and share its profits and losses.

Definition

According to **Section 4 of the Partnership Act 1932** “Partnership is the relation between persons who have agreed to share the profits of a business carried on by all or any of them acting for all.

Features of partnership Firm

- | | |
|--|---|
| 1. Association of two or more persons | 2. Partnership Agreement or Deed |
| 3. Legal Business | 4. Sharing of Profits or Losses |
| 5. Mutual Agency | 6. Unlimited Liability |

Partnership Deed: The document, which contains terms of the agreement, is called “Partnership Deed”.

Provisions of Partnership Act, 1932 in the absence of Partnership Deed:

- 1) Profit Sharing Ratio:** If the partnership deed is silent about the profit-sharing ratio, the profits and losses of the firm are to be shared equally by partners
- 2) Interest on Capital:** No interest on capital is payable if the partnership deed is silent on the issue.
- 3) Interest on Drawings:** No interest is to be charged on the drawings made by the partners, if there is no mention in the deed.
- 4) Interest on Advances:** If any partner has advanced some money to the firm beyond the amount of his capital for the purpose of business, he shall be entitled to get an interest on the amount at the rate of 6% per annum.
- 5) Remuneration for Firm's Work:** No partner is entitled to get salary or other remuneration for taking part in the conduct of the business of the firm

Fixed and Fluctuating Capital Accounts of Partners

There are two methods by which the capital accounts of partners can be maintained.

Fixed capital method

Fluctuating capital method.

- 1) Fixed Capital Method:** Under the fixed capital method, **the capitals of the partners shall remain fixed** unless additional capital is introduced or a part of the capital is withdrawn as per the agreement among the partners All items like share of profit or loss, interest on capital, drawing interest on drawings, etc. are recorded in separate accounts, called Partner's Current Account. The partners' capital accounts will always show a credit balance, which shall remain the same (fixed) year after year unless there is any addition or withdrawal of capital.

The Partners' current A/c on the other hand, may show a debit or a credit balance.

Thus, under this method, two accounts are maintained for each partner viz., capital A/c & Current A/c, While the Partners' Capital A/c shall always appear on the liabilities side in the balance sheet, the Partners' Current Ac's balance shall be shown on the liabilities side, if they have credit balance and on the assets side, if they have debit balance.

The partner's capital account and the current account under the fixed capital method would appear as shown below:

Dr.				Partner's Capital A/c				Cr.

	To Balance c/d		xxx		By P&L Appro. A/c (for share of profit)		xxx		
			XXXX				XXXX		

Fluctuating Capital Method: Under the fluctuating capital method, only one A/c, i.e. Capital A/c is maintained for each partner. All the adjustments such as share of profit & loss, interest on capital, drawings, interest on drawings, salary or commission to partners, etc. are recorded directly in the capital accounts of the partners. This makes the balance in the capital account fluctuate from time to time. That's the reason why this method is called **fluctuating capital method**. **In the absence of any instruction, the capital account should be prepared by this method.** The Proforma of capital accounts prepared under the fluctuating capital method is given below: -

MIND MAP

Distribution of Profit among Partners

The profits and losses of the firm are distributed among the partners in an agreed ratio. However, if the partnership deed is silent, the firm's profits and losses are to be shared equally by all the partners. In case of partnership, however, certain adjustments such as interest on drawings, interest on capital, salary to partners, and commission to partners are required to be made. For this purpose, it is customary to prepare a Profit and Loss Appropriation A/c of the firm and ascertain the final figure of profit and loss to be distributed among the partners, in their profit-sharing ratio.

The Proforma of Profit and Loss Appropriation Account is given as follows:

Dr.		Profit and Loss Appropriation A/c		Cr.

Period for calculation of IOD (in month)	6.5	6	5.5	7.5	6	4.5	9	6	3	3.5	3	2.5

Average Period is calculated using this formula:

$$\text{*Average Period} = \frac{\text{Months left after 1st instalment} + \text{Months left after 2nd instalment}}{2}$$

Past Adjustments:

If after closing the accounts for the year it is discovered that some errors have been committed, then these errors must be rectified. Some adjustment entries must be passed to rectify the error. The entries are made through Profit & Adjustment A/c. These entries are to rectify the errors committed in past; therefore, they are known as 'Past Adjustments'.

Generally, the following types of errors are committed:

- 1) Interest on Capital and on Drawings have been omitted.
- 2) Interest on Capital and on Drawings have been provided at higher or lower rates than the rates agreed in the Deed.
- 3) Salary/commission to partners either not given or a higher or lower amount has been given.
- 4) Profits shared the wrong ratio.

Guarantee of Profit to a Partner

Guarantee of profit means a minimum amount of profit to be paid to a partner. This amount shall be given to him if his share of profit is lower than the guaranteed amount. The deficit shall be borne either by one of the old partners or by all the old partners in a particular agreed ratio. If there is no agreement, then in their old profit-sharing ratio, if his actual share of profit is more than the guaranteed amount, then, he will be given his actual share of profit. He gets the guaranteed amount or the actual share of profit, **whichever is higher**.

1) Guarantee given by all Partners (Guarantee given by Firm.)

- (i) Compare the amount of guarantee and his actual share of profit. If guaranteed amount is more than his actual share of profit, then the guaranteed amount will be debited to profit & loss Appropriation A/c & the Partner's A/c will be credited with the guaranteed amount.
- (ii) The deficiency shall be shared by other partners in their profit-sharing ratio.

2) Guarantee given by One Partner only

First calculate his share of profit. Compare it with the guaranteed amount. The amount of deficiency is to be charged from the partner who gave guarantee.

3) Guarantee given to a partner by other partners in a ratio different from their profit-sharing ratio

Distribute profit among all the partners in the profit-sharing ratio. Work out the amount of deficiency by comparing it with the guaranteed amount and his actual share of profit. The other partners will bear the deficiency in an agreed new ratio.

Practice Questions [1- Mark Questions-MCQ]

1	Arman a partner was being guaranteed that his share of profits will not be less than ₹60,000 p.a. Deficiency, if any was to be borne by other partners Kailash & Diljeet equally. CH - 02: RECONSTITUTION OF A PARTNERSHIP FIRM

(CHANGE IN PROFIT SHARING RATIO & ADMISSION OF A PARTNER)

MIND MAP

CHANGE IN PROFIT SHARING RATIO

Reconstitution of firm: Any change in existing agreements among partners amounts to reconstitution of the firm, this results in the end of an existing agreement, and a new agreement comes into existence however the firm continues

- a) Concept of Change in the Profit-Sharing Ratio among existing partners:
- b) It means reconstitution of the firm whereby the profit-sharing ratio among all the partners changes.
- c) It can be due to change in capital contribution or increased participation in management by one or more partners.
- d) It can also be on account of one or more partner(s) acquiring share of profit in the business from another partner(s). Therefore, the aggregate amount of gain of one (or more) partner(s) is equal to the aggregate amount loss/sacrifice borne by other partner(s).
- e) Therefore, if the share of one (or more) partner(s) increases then share of profit of one (or more) partner(s) decreases.
- f) It leads to dissolution of partnerships but not the dissolution of the firm. This is because the existing partnership agreement is ending and the new agreement is coming into effect.

Adjustment for Change in Profit Sharing Ratio: Issues that need to be considered at the time of change in Profit Sharing Ratio:

- a) Determining Sacrificing and Gaining ratio,
- b) Treatment for Goodwill,
- c) Accounting treatment for Reserves and Accumulated Profit or losses,
- d) Revaluation of Assets and Reassessment of Liabilities, and
- e) Adjusting the capital accounts of the partners for the same.

Computation of Sacrificing and Gaining Ratio: The main purpose of calculating the sacrificing and gaining ratio is to determine the amount of compensation (goodwill) that the gaining partner shall pay to the sacrificing part

- a) **Sacrificing Ratio** (Sacrificed Share) = Old Share – New Share
b) **Gaining Ratio:** (Gaining Share) = New Share – Old Share

EFFECT ON ACCUMULATED RESERVES AND SURPLUS: -

In case of reconstitution of firm **old, accumulated reserves and surplus** are distributed among partners in **their old ratio**.

- a) **In case of distribution of accumulated profits/reserves etc.**

Reserve A/c Dr.
To Partner's capital/current A/c (individually)
(In case of loss will be reserved entry)

- b) **In case partners don't want share distribution**

5 Solution (Step by Step)
1. **Old Ratio** = 4:3:2 → Total parts = 9 → P = 4/9, Q = 3/9, R = 2/9
2. **New Ratio** = 3:3:3 → Total parts = 9 → P = 3/9, Q = 3/9, R = 3/9
3. **Change in Share:**
P: Old = 4/9, New = 3/9 → **Loss = 1/9** Q: Old = 3/9, New = 3/9 → **No change**
R: Old = 2/9, New = 3/9 → **Gain = 1/9**
Sacrificing Ratio = P: (Loss) = 1/9 **Gaining Ratio** = R: (Gain) = 1/9

Goodwill and Methods of Valuation of Goodwill

Meaning of Goodwill:

Over a period, a well-established business develops an advantage of good name, reputation and wide business connections. This helps the business to earn more profits as compared to a newly set up business. In accounting, the monetary value of such advantage is known as "goodwill".

Definition: Goodwill is an intangible asset that represents the value of a firm's reputation, brand, customer relations & other non-physical assets that contribute to earning potential. It is often considered when calculating the value of a business during acquisitions or mergers.

Factors Affecting the Value of Goodwill

The main factors affecting the value of goodwill are as follows:

- | | | |
|-----------------------|-----------------------|-----------------------------|
| 1. Nature of business | 2. Location | 3. Efficiency of management |
| 4. Market situation | 5. Special advantages | |

Need for Valuation of Goodwill

In a partnership firm, goodwill needs to be valued in the following circumstances:

1. Change in the profit-sharing ratio amongst the existing partner;
2. Admission of new partner;
3. Retirement of a partner;

4. Death of a partner; and
5. Dissolution of a firm involving sale of business as a going concern.
6. Amalgamation of partnership firm

Methods of Valuation of Goodwill

1. Average Profits Method

(a) Simple Average method

Stepwise procedure to calculate Goodwill under this method:

Step1: Work out profits or losses given for each of the past year after taking into account abnormalities, if any.

Step2: Calculate average by dividing the total profit of all the year by the No. of years.

Step3: Goodwill = Average Profit x No. of year's purchase.

(b) Weighted Average

Under this method, earlier year are less important than the recent years. Thus, each year's profit is multiplied by its respective number (weight) in chronological order. The latest year will be given the highest weight, and the earliest year will be given lowest weight. Each profit figure will be multiplied by its weight and then the total of these products will be calculated. This total will be divided by the total of weights.

Then Goodwill = Weighted Average x No. of years purchase

2. Super Profit Method

Stepwise procedure to calculate Goodwill under this method:

- ✓ Calculate the average profit,
- ✓ Calculate the normal profit on the capital employed on the basis of the normal rate of return,
- ✓ **Formula:** Normal Profit = Capital Employed x NRR /100
- ✓ Calculate the super profits by deducting normal profit from the average profits,
- ✓ **Formula:** Super Profit = Average Profit - Normal Profit
- ✓ Goodwill = Super profits x No. of years' purchases

3.Capitalisation Method:

Under this method the goodwill can be calculated in two ways:

- (a) by Capitalizing the Average Profits (b) by Capitalizing the Super Profits.

Capitalization of Average Profits:

This involves the following steps:

- ✓ As certain the average profits are based on the past few years' performance.
- ✓ Capitalize the average profits based on the normal rate of return to ascertain the capitalized value of average profits as follows:

Average Profitsx100/ Normal rate of Return

As certain the actual capital employed (net assets) by deducting outside liabilities from the total assets (excluding goodwill).

Capital Employed/Net Assets=Total Assets (excluding goodwill)–Outside Liabilities

Compute the value of goodwill by deducting net assets from capitalized value of average profits, i.e. (ii)–(iii).

Capitalization of Super Profits: It involves the following steps.

Calculate capital employed of the firm, which is equal to total assets minus outside liabilities.

Calculate normal profit = Capital Employed X Normal Rate of Return/100

Calculate average profit for past year, as specified.

Super profits = Average profits/Actual profit - normal profits

Goodwill = Super Profits × 100/ Normal Rate of Return

Note: In other words, goodwill is the capitalized value of super profits. The amount of goodwill worked out by this method will be the same as calculated by capitalizing the average profits.

$$= ₹60,000 \times 3 = ₹1,80,000$$

2. Super Profit Method:

Q: Capital employed = ₹5,00,000, Normal rate of return = 10%, Average profit = ₹80,000
Calculate goodwill for 4 years' purchase.

Sol: Normal Profit = ₹5,00,000 × 10% = ₹50,000; Super Profit = ₹80,000 – ₹50,000 = ₹30,000
Goodwill = Super Profit × No of Years' Purchase = ₹30,000 × 4 = ₹1,20,000

3. Capitalisation Method

Q: Average profit = ₹1,00,000; Normal rate of return = 10% Capital employed = ₹8,00,000
Find goodwill.

Sol: Capitalized Value of Business = Avg. Profit × 100 / Normal Rate of Return
= ₹1,00,000 × 100 / 10 = ₹10,00,000

Goodwill = Capitalized Value – Capital Employed = ₹10,00,000 – ₹8,00,000 = ₹2,00,000

Right to share the assets (to get this right, the new partner brings an amount of capital)
The old partners sacrifice their share of profits in favour of a new partner & get the amount of the premium of goodwill.

Goodwill is an intangible asset, is recognized in books only if it is purchased goodwill. It is written off by debiting old partners' capital/current accounts in their old profit-sharing ratio. Self-generated goodwill is adjusted through partners' capital/current accounts.

The Following Adjustments are needed at the time of admission of a New Partner:

1. Calculation of New Profit-Sharing Ratio & Sacrificing Ratio
2. Accounting treatment of Goodwill
3. Accounting treatment for revaluation of assets and reassessment of liabilities.
4. Accounting treatment of reserves and accumulated profits
5. Accounting treatment of Deferred Revenue Expenditure (Advertisement expenses)
6. Adjustment of Partners' Capital on the basis of new profit-sharing ratio.

Calculation of New Profit-Sharing Ratio

When a new partner is admitted, he acquires his share of profits from the old partners. In other words, on the admission of a new partner, the Old Partners Sacrifice share of their profit in favour of the new partner.

However, if nothing is specified as to how the new partner acquires his share from the old partners, it may be assumed that he gets it from them in their old profit-sharing ratio.

Sacrificing ratio- The ratio in which the old partners agree to sacrifice their share of profit in favour of the incoming partner is called the sacrificing ratio.

$$\text{Sacrifice by a Partner} = \text{Old Share of Profit} - \text{New Share of Profit}$$

EXAMPLE:

Rohit and Mohit are partners in a firm sharing profits in the ratio of 5:3. They admit Bijoy a partner for a $\frac{1}{7}$ share in the profit. The new profit-sharing ratio is 4:2:1.

Rohit's sacrifice = $\frac{5}{8} - \frac{4}{7} = \frac{3}{56}$; Mohit's sacrifice = $\frac{3}{8} - \frac{2}{7} = \frac{5}{56}$

Thus, the sacrificing ratio between Rohit and Mohit will be 3:5.

If nothing is specified as to how does the new partner acquires his share from the old partners, it may be assumed that he gets it from them in their old profit-sharing ratio (i.e., sacrificing ratio = old profit-sharing ratio)

CASE I:

The old profit-sharing ratio and proportionate share of the new partner are given. Nothing is specified as to the ratio in which the new partner acquires his share from the old partners.

EXAMPLE:

Anil and Vishal are partners, sharing profits in the ratio of 3:2. They admitted Sumit as a new partner for a $\frac{1}{5}$ share in the future profits of the firm.

Sumit's share = $\frac{1}{5}$. Therefore, the combined share of Anil and Vishal = $1 - \frac{1}{5} = \frac{4}{5}$.

Anil's new share = $\frac{3}{5} \times \frac{4}{5} = \frac{12}{25}$; Vishal's new share = $\frac{2}{5} \times \frac{4}{5} = \frac{8}{25}$

New profit-sharing ratio of Anil, Vishal and Sumit = $\frac{12}{25} : \frac{8}{25} : \frac{1}{5} = 12:8:5$

CASE II:

The old profit-sharing ratio, share of the new partner and the new ratio between old partners are given.

EXAMPLE:

Amar and Bahadur are partners in a firm sharing profits in the ratio of 3:2. They admitted Mary as a new partner for a $\frac{1}{4}$ share.

The new profit-sharing ratio between Amar and Bahadur will be 2:1; Mary's share = $\frac{1}{4}$.

Therefore, the combined share of Amar and Bahadur = $1 - \frac{1}{4} = \frac{3}{4}$

which is to be shared by Amar and Bahadur in 2:1.

Thus, Amar's new share = $\frac{2}{3} \times \frac{3}{4} = \frac{6}{12}$; Bahadur's new share = $\frac{1}{3} \times \frac{3}{4} = \frac{3}{12}$

Therefore, the new profit-sharing ratio of Amar, Bahadur and Mary = $\frac{6}{12} : \frac{3}{12} : \frac{1}{4} = 2:1:1$.

Calculation of Sacrificing Ratio: Old ratio – New ratio

Amar's sacrifice = $\frac{3}{5} - \frac{2}{4} = \frac{2}{20}$; Bahadur's sacrifice = $\frac{2}{5} - \frac{1}{4} = \frac{3}{20}$.

Therefore, the sacrificing ratio between Amar and Bahadur = 2:3

CASE III:

Old partners, old profit-sharing ratio, new partner's share and sacrificing ratio are given

EXAMPLE:

Akshay and Bharti are partners sharing profits in the ratio of 3:2. They admit Dinesh as a new partner for a $\frac{1}{5}$ th share in the future profits of the firm, which he gets equally from Akshay and Bharti.

Sacrificing Ratio of Akshay and Bharti = 1:1

Therefore, Akshay's Sacrifice = Bharti's Sacrifice = $\frac{1}{2} \times \frac{1}{5} = \frac{1}{10}$

Calculation of new profit-sharing ratio:

New share of an existing partner = Old share - Sacrificing share

Akshay's new share = $\frac{3}{5} - \frac{1}{10} = \frac{5}{10}$; Bharti's new share = $\frac{2}{5} - \frac{1}{10} = \frac{3}{10}$.

Therefore, the New Profit-Sharing Ratio between Akshay, Bharti & Dinesh

= $\frac{5}{10} : \frac{3}{10} : \frac{1}{5} = 5:3:2$

CASE IV:

Old Partners' old profit-sharing ratio, New Partner's share and Old Partners absolute sacrificing share are given

EXAMPLE

Anshu and Nitu are partners sharing profits in the ratio of 3:2. They admitted Jyoti as a new partner for a $\frac{3}{10}$ share, which she acquired $\frac{2}{10}$ from Anshu and $\frac{1}{10}$ from Nitu.

Sacrificing ratio of Anshu and Nitu = $\frac{2}{10} : \frac{1}{10} = 2:1$

Calculation of new profit-sharing ratio:

New share of an existing partner = Old Share - Sacrificing Share

Anshu's New Share = $\frac{3}{5} - \frac{2}{10} = \frac{4}{10}$; Nitu's New Share = $\frac{2}{5} - \frac{1}{10} = \frac{3}{10}$.

Therefore, the New Profit-Sharing Ratio b/w Anshu, Nitu & Jyoti = $\frac{4}{10} : \frac{3}{10} : \frac{3}{10} = 4:3:3$

CASE V:

Old Partners, old profit-sharing ratio and their relative sacrificing share are given.

EXAMPLE

Ram and Shyam are partners in a firm sharing profits in the ratio of 3:2. They admit Ghanshyam as a new partner. Ram surrenders $\frac{1}{4}$ of his share and Shyam $\frac{1}{3}$ of his share in favour of Ghanshyam.

Share surrendered by Ram (Ram's sacrificing share) = $\frac{1}{4} \times \frac{3}{5} = \frac{3}{20}$

Shyam's sacrificing share = $\frac{1}{3} \times \frac{2}{5} = \frac{2}{15}$

Therefore, the Sacrificing Ratio of Ram and Shyam = $\frac{3}{20} : \frac{2}{15} = 9:8$

Calculation of New Profit-Sharing Ratio:

New share of a partner = Old share - Sacrificing share

Ram's new share = $\frac{3}{5} - \frac{3}{20} = \frac{9}{20}$; Shyam's new share = $\frac{2}{5} - \frac{2}{15} = \frac{4}{15}$

Ghanshyam's share = Ram's sacrifice share + Shyam's sacrificing share
 $= \frac{3}{20} + \frac{2}{15} = \frac{17}{60}$

Therefore, New profit-sharing ratio among Ram, Shyam and Ghanshyam
 $= 9/20 : 4/15 : 17/60 = 27:16:17$

CASE VI:

Not all the old partners sacrifice their share of profit in favour of the new partner. In fact, some old partner(s) may gain on the admission of a new partner.

EXAMPLE

Ramesh and Suresh are partners in a firm sharing profits in the ratio of 4:3. They admitted Mohan as a new partner.

The profit-sharing ratio of Ramesh, Suresh and Mohan will be 2:3:1

Ramesh's Sacrifice = Old Share - New Share = $\frac{4}{7} - \frac{2}{6} = \frac{10}{42}$

Suresh's Sacrifice = Old Share - New Share = $\frac{3}{7} - \frac{3}{6} = -\frac{3}{42}$ (gain)

Thus, Suresh gains $\frac{3}{42}$ nd share of profit on Mohan's admission.

So, he will also compensate for an amount equal to "Goodwill of the firm $\times \frac{3}{42}$ to Ramesh.

(Ramesh's sacrifice = Suresh's gain + Mohan's share (gain) = $\frac{3}{42} + \frac{1}{6} = \frac{10}{42}$.)

In this case, the whole sacrifice is by Ramesh.)

Absolute and Relative sacrificing share

If A & B are partners, who share profits & losses in the ratio 3:2, admitted C is admitted as a partner.

- **A sacrifice $\frac{1}{4}$ from his share**, which means that $\frac{1}{4}$ is the absolute sacrificing share of A. Therefore, A's sacrifice = $\frac{1}{4}$
- **A sacrifice $\frac{1}{4}$ of his share means** that $\frac{1}{4}$ is not the absolute sacrificing share of A, but the relative sacrificing share i.e.,

A's sacrifice = $\frac{1}{4} \times \frac{3}{5} = \frac{3}{20}$. Thus $\frac{3}{20}$ is A's absolute sacrificing share

Accounting treatment of Goodwill

Treatment of Investment Fluctuation Fund/ Reserve

Investment Fluctuation Fund/Reserve is created to meet the loss on account of a decrease in the market value of investments made by the partnership firm, say in Shares in X Ltd., x% Govt. Bonds, etc.

CASE 1:

Loss due to a fall in the market value of investments will be set off from the Investment Fluctuation Fund/Reserve.

The Surplus of Investment Fluctuation Fund/Reserve (i.e. Investment Fluctuation Fund/Reserve - Decrease in market value investments) will be distributed among the old partners in their old profit-sharing ratio, i.e. credited to their Capital/Current Accounts. The following Journal Entry will be passed:

Investment Fluctuation Fund A/c	Dr.
To Investments A/c (decrease in value of investment)	
To Old Partners Capital A/cs (Individually, in their old ratio)	

CASE 2:

In case there is no decrease in the value of investments:

The total amount of Investment Fluctuation Fund will be distributed among the old partners in their old profit-sharing ratio.

The following Journal Entry will be passed:

Investment Fluctuation Fund A/c	Dr.
To Old Partners' Capital A/cs (Individually, in their old ratio)	

CASE 3:

In case, fall in value of investment exceeds the Investment Fluctuation Fund:

The excess amount of loss will be debited to Revaluation A/c. The following Journal Entry will be passed:

Investment Fluctuation Fund A/c	Dr.
Revaluation A/c	Dr.
To Investments A/c (decrease in value of investment)	

Adjustment of Partners Capital on the basis of new profit-sharing ratio:

TYPE 1: Partners agree that their capital should be adjusted so as to be proportionate to their new profit-sharing ratio.

In such a situation, if the capital of the new partner is given, the same can be used as a base for calculating the new capital of the old partners. The new capitals thus ascertained should be compared with their old capitals after all adjustments relating to goodwill, reserves and revaluation of assets and liabilities, etc. have been made, and then the partner whose capital falls short, will bring in the necessary amount to cover the shortage and the partner who has a surplus, will withdraw the excess amount of capital.

STEP 1: Calculation of total capital of the new firm on the basis of new partners' capital and their share in profits

Total capital of the new firm = New partner's capital × Reciprocal of New Partner sh.

STEP 2: Divide the total capital of the new firm in the new profit-sharing ratio to calculate new capitals of old partners.

STEP 3: Compare adjusted capitals of old partners (i.e., old capitals after all adjustments relating to goodwill, reserves and revaluation of assets and liabilities, etc.) with new capitals to calculate excess/shortage of capital.

STEP 4: Adjustment of Excess/Shortage of capital through cash/bank or current accounts

TYPE 2: New partner must bring his proportionate capital when new partner's capital is not given in the question.

New partners = $\frac{\text{Sum of adjusted capitals of old partners}}{\text{New Partner's Share}} \times \frac{1}{1 - \text{New Partner's Share}} \times \text{New partner's share Capital}$

CHAPTER 3. RECONSTITUTION OF PARTNERSHIP FIRM (RETIREMENT/DEATH OF A PARTNER)

- On the retirement or death of a partner, the **existing** partnership deed comes to an **end**, and in its place, a **New Partnership deed** needs to be framed whereby, the remaining partners continue to do their business on changed terms and conditions.
- A partner has **right to retire** from the firm after giving due notice in advance.
- There is not much difference in the accounting treatment at the time of retirement or in the event of death.
- Partner can retire from the firm in the following circumstances.
 - With the consent of all the partners.
 - As per the terms of the partnership agreement
 - By giving a notice in writing to all the partners, if the partnership is at will.

The retirement/death of a partner is called reconstitution of the partnership firm because the old agreement is terminated but the firm continues and the new agreement comes in to force.

The following need to be dealt with while doing accounting treatment of Retirement/Death of a partner

or a partner	Calculation New profit-sharing ratio and gaining/sacrificing ratio	Adjustment of revaluation of assets and reassessment of liabilities.		
	Treatment of goodwill	Adjustment of undistributed reserves and profits and losses A/c. Ascertaining the Amount Due to Retiring/ Deceased Partner

CALCULATION OF NEW RATIO AND GAINING RATIO:

- New profit-sharing ratio (**NPSR**) is the ratio in which the **remaining** partners will share future profits after the retirement or death of any partner.
- The new share of each of the remaining partner will consist of his own share in the firm plus the share acquired from the retiring /deceased partner.

New ratio = Old Ratio + Gaining Ratio

Gaining Ratio: - The ratio in which the continuing partners have acquired the share from the retiring or deceased partner is called the gaining ratio.

- Normally, the continuing partners acquire the share of retiring/deceased partner in their old profit-sharing ratio, in that case, the gaining ratio of the remaining partners will be the same as their old profit-sharing ratio among them & there is no need to compute the gaining ratio.
- Gaining ratio is calculated to ascertain the amount of goodwill payable to retiring or deceased partner by the remaining partners

Gaining ratio = New ratio – Old ratio

TREATMENT OF GOODWILL: -

The retiring partner share of goodwill is credited to capital A/c of respective partner & debited to Remaining Partners' Capital in gaining ratio.

JOURNAL ENTRY:

Gaining Partner Capital or Current A/c (in Gaining Ratio) Dr.

To Retiring/Deceased Partner's Capital/c (With the Share of Goodwill)

Retirement normally takes place at the end of an accounting period; the death of a partner may occur any time.

CALCULATION WITH TIME BASIS

Interest on capital
Interest on loan, if any
Interest on drawings
P & L A/c (share in profits up to the date of retirement/ death)
Accumulated profits and losses

CALCULATION WITHOUT TIME BASIS

Share of goodwill of retiring/deceased partner
General reserve
Contingency reserve
Workmen compensation fund
Investment fluctuation fund

Disposal of Amount Due to Retiring Partner

The outgoing partner's account is settled as per the terms of partnership deed i.e., in lumpsum immediately or in various instalments with or without interest as agreed or partly in cash immediately and partly in instalment at the agreed intervals. In the absence of any agreement, **Section 37 of the Indian Partnership Act, 1932 is applicable**, which states that the outgoing partner has an option to receive either interest @ 6% p.a. till the date of payment or such share of profits which has been earned with his/her money (i.e., based on capital ratio). Hence, the total amount due to the retiring partner which is ascertained after all adjustments have been made is to be paid immediately to the retiring partner. In case the firm is not in a position to make the payment immediately, the amount due is transferred to the retiring Partner's Loan Account, and as and when the amount is paid it is debited to his account.

DEATH OF A PARTNER

- When a partner in a partnership firm dies, the partnership, by default, is dissolved, unless the partnership agreement stipulates otherwise.
- The deceased partner's estate becomes responsible for their share of the firm's assets and liabilities & the remaining partners may choose to continue the business as a new partnership.
- The deceased partner's share is typically valued and paid to their legal representatives or executors.
- In the event of a death of a partner, we generally required to prepare the Deceased Partner Capital a/c and his balance will be transfer to his executor.

1. Accounting Adjustments:

Revaluation of Assets & Liabilities: Assets & liabilities are revalued to reflect their current market values.

2. Reserves and Profits Distribution: Reserves and accumulated profits are distributed among all partners, including the deceased partner, in their old profit-sharing ratio.

3. Goodwill Adjustment: If the firm has goodwill, it's adjusted, and the deceased partner's share of goodwill may be credited to their capital account,

4. Interest on Partners Loan: If deceased partner given a loan to the business, then in the absence of any adjustment interest will be given to deceased partner @6% p.a.

5. Profit Calculation: The deceased partner's share of profits up to the date of death is calculated. This may be done on a time basis (using Previous Year's Profit) or a Sales basis or Avg. Profit basis.

On the basis of Last Year Profit	Last Year Profit x his Share x time period/12
On the basis of Average Profit	Average Profit x his Share x time period/12
On the Basis of Sales	Last Year Profit x Current Year Sales x his/her Share / Last year Sales

Settlement with Executor: The Deceased Partner's Capital A/c is closed by transferring the due amount to their Executor's A/c.

Sequence of Settlement of Accounts (Sec. 48)

1. Pay debts to outsiders
2. Repay partners' loans/advances
3. Repay partners' capital
4. Distribute surplus among partners

Losses borne in order: profits → capital → partners individually (profit-sharing ratio).

Private vs. Firm Debts (Sec. 49)

Firm property → firm debts first, surplus for partners.

Partner's private property → private debts first, surplus may cover firm debts.

PART-II: ACCOUNTING FOR COMPANIES

CHAPTER-05: ACCOUNTING FOR SHARE CAPITAL

FEATURES OF COMPANY:

1. Separate Legal Entity	Distinct and completely separate from its members. Can buy property, enter contracts & sue/be sued in its own name.
2. Perpetual Succession	Continuous existence. Life is unaffected by death, retirement, insolvency, or insanity of shareholders. It goes on until legally dissolved.
3. Limited Liability	Liability of members is strictly capped at the unpaid face value of their shares. Personal assets of shareholders are fully protected.
4. Artificial Legal Person	Created via legal process. It lacks physical existence but operates with legal rights & carries out business through its Board of Directors.
5. Common Seal	Acts as the official signature of the company. Contracts bearing it become legally binding. (Now optional under latest law if signed by authorized personnel).
6. Transferability of Shares	Shares of a public company can be freely transferred or sold to others without needing permission from the company.
7. Separate Management	Ownership is distinct from control. Scattered shareholders are the owners, while an elected Board of Directors manages daily operations.

TYPES OF COMPANIES:

TYPES OF COMPANIES (Companies Act, 2013)		
1. One Person Company (OPC)	2. Private Company	3. Public Company

SHARE AND SHARE CAPITAL: NATURE AND TYPES

According to the Section 2(84) of the Companies Act, 2013, a share is defined as “a share in the share capital of a company and includes stock”. Share is a unit in which capital of the company is divided. Each share has its nominal (face) value. Holders of these shares are called Shareholders or Members of the company.

In simple terms, the total capital of a company is divided into a large number of small, indivisible units of equal value. Each such individual unit is called a share. For example, if the total capital of a company is ₹10,000,000 and it is divided into 2.

As per Section 43 of the Companies Act, 2013, a company can issue only two **classes of shares**:

A. Preference Shares:

Preference shares are those shares which carry certain special or preferential rights over equity shares.

i) Preferential Right to Dividend: The right to receive a dividend calculated at a fixed rate or amount, before any dividend is paid to the equity shareholders.

ii) Preferential Right to Repayment of Capital: The right to the repayment of capital on the winding up or liquidation of the company before the capital of equity shareholders is returned.

B. Equity Shares:

According to the Companies Act, 2013, Equity Shares are those shares which are not preference shares. They do not carry any preferential rights regarding dividends or repayment of capital. They represent the true ownership of the company.

i) Dividend Fluctuations: The rate of dividend on equity shares is not fixed. It depends on the profits available after paying preference dividends and is recommended by the Board of Directors.

ii) Voting Rights: Equity shareholders have full voting rights and control over the management of the 1,000,000 units of ₹10 each, then each unit of ₹10 is a share of the company.

Comparison: Equity Shares vs. Preference Shares

Basis of Distinction	Preference Shares	Equity Shares
Dividend Rate	Paid at a predefined, fixed percentage rate.	Fluctuates dynamically based on annual profits.
Payment Order	Given preferential priority before equity.	Paid at the end, only after preference claims.
Arrears Tracking	Can accumulate across years if profits drop.	Never accumulate. Missed dividends are lost.
Winding Up	Capital is refunded before equity shares.	Refunded at the absolute end if assets remain.
Voting Rights	No general voting rights in board meetings.	Enjoys full voting rights on all core matters.
Redemption Status	Must be redeemed/repaid within 20 years.	Not redeemable during the lifetime of company.

FOUR STAGES OF INCORPORATION OF A COMPANY:

Share Capital and its Classification:

Share Capital is the amount received by a company towards share as both Equity and Preference Shares.

SUBSCRIBED SHARE CAPITAL

Subscribed share capital is a part of issued share capital that is subscribed.
Subscribed share capital is shown as
Subscribed and fully paid-up (b)Subscribed but not fully paid-up

ISSUE OF SHARES:

Shares can be issued by placing them privately or by issuing them to public known as:
Private placement of shares means issue and allotment of shares to a selected group of investors privately to raise capital and not to public in general through public issue.
Public issue of shares means issue of shares by a company to public for subscription.

ACCOUNTING OF SHARES: A company may issue shares either:

I. FOR CASH:

Issue of shares for cash means the company receives the issue price of shares by cheque or by any other banking instrument such as Bank transfer or Bank Draft.

II. FOR CONSIDERATION OTHER THAN CASH:

Shares issued for consideration other than cash means the company has not received amount against the shares issued instead has received assets or services.

I. ISSUE OF SHARES FOR CASH

Shares may be issued:

AT PAR:

Issue of shares at par means issue price of share and its nominal (face) value are same. For example, issue price and nominal (face) value of the share is ₹10.

AT PREMIUM:

Issue of shares at premium means shares have been issued at a value that is higher than its nominal (face) value. For example, a share with nominal (face) value of ₹10 issued at ₹15, premium being ₹5.

NOTE: The Companies Act, 2013 does not allow issue of shares at a discount except when issued as Sweat Equity.

ISSUE PRICE MAY BE PAYABLE

IN LUMP SUM ALONG WITH THE APPLICATION

IN INSTALMENTS AT DIFFERENT STAGES, i.e., partly on application, partly on allotment and balance in one or more calls.

UTILISATION OF SECURITIES PREMIUM ACCOUNT (SPA)

TYPES OF SHARE SUBSCRIPTION:

- Fully Subscription:** Occurs when the number of shares applied for by the public equals the number of shares offered by the company.
- Over Subscription:** Occurs when public demand exceeds the number of shares offered, requiring proportional allotment (Pro-Rata) or refunds.
- Under Subscription:** Occurs when the number of shares applied for is less than the offer, which may require the support of underwriters to meet the minimum subscription threshold.

Accounting Treatment of Oversubscription of Shares:

Meaning of Oversubscription: Oversubscription means, the number of applications received are more than the number of shares offered.

- In such case, allotment can be done by any of the 3 alternatives available First Alternative: Under this alternative, some applications are accepted and excess applications are rejected.
- Second Alternative: Under this alternative, all applicants are allotted shares in proportion which is known as Partial or Pro-rata Allotment.
- Third Alternative: Under this alternative, a combination of the above two alternatives may be adopted.

If the shares are allotted against the application, then there is no adjustment required as share capital is credited against the application money received. However, if the applications are rejected, the application money with respect to the rejected applications can be refunded or adjusted (in case of pro-rata allotment) against the allotment or calls on shares.

Meaning of Pro-rata Allotment of Shares:

- This is one of the alternative available with the company for allotment of shares when the number of shares applied for are more than the number of shares offered for subscription.
- As per this alternative, all applicants are allotted shares in proportion which is called Partial or Pro rata Allotment.

Treatment of Surplus Application Money on Pro-rata Allotment:

- If the question is silent or states that 'excess application money received is to be adjusted against allotment', surplus application money is adjusted against allotment money due and excess application money, if any is refunded.
- If the question requires that surplus application money is to be refunded after adjustment of Allotment Money and Call Money, then the amount is transferred to Shares Allotment Account and Calls-in Advance Account. The balance, if still left, is refunded.

Computation of Amount not Received on Allotment in Case of Pro-rata: In case where the shares are allotted on pro-rata basis and one or some of the shareholders of pro-rata category fail to pay the allotment money, then it is necessary to compute the amount not received on allotment as per the following steps:

Step 1: Compute the number of shares applied or allotted using the following formulae:

- When the shares allotted are given:

Number of Shares Applied are:

$(\text{Total Shares Applied} / \text{Total Shares Allotted}) \times \text{Number of Shares Allotted}$

- When the shares applied are given:

Number of Shares Allotted are:

$(\text{Total Shares Allotted} / \text{Total Shares Applied}) \times \text{Number of Shares Applied}$

Step 2: Calculate the Allotment Amount not paid by defaulting shareholders:

Amount due on Allotment (Shares Allotted x Allotment Money per Share)	Rs.
Less: Excess Application Money Adjusted on Allotment	...
(Shares Applied – Shares Allotted) x Application Money per share	...
Allotment Amount due but not paid	...

PREPARATION OF CASH BOOK

Cash Book is a Special Journal which is used for recording cash transactions. When shares are issued for cash, cash book may have to be prepared. As a result,

- Cash transactions are recorded in a Cash Book, and

b. Non-cash transactions are recorded in Journal

CALLS-IN-ARREARS

Calls-in-arrears is the amount called by the company to be paid on shares but not paid by the shareholders.

Interest on calls-in-arrears is chargeable if allowed by the Articles of Association. If it is not specified, it is charged @ 10% p.a. as it prescribed in table F of the Companies Act, 2013.

CALLS-IN-ADVANCE

Calls-in-Advance means amount received by the company against shares that was not due.

Interest on calls-in-advance is paid if the Articles of Association so provides. But if it is silent, provisions of Table F of the Companies Act, 2013 is apply and the company is liable to pay interest @ 12% p.a.

ACCOUNTING TREATMENT OF CALLS-IN-ARREARS:

This can be done in 2 ways as follows:

a. Accounting treatment without opening Calls-in-Arrears Account:

Call Money Due:

Share First Call A/c ...Dr.
To Share Capital A/c
[with actual amount due on say, 1,000 shares @ 5 each]

Call Money Received:

Bank A/c ...Dr.
To Share First Call A/c
[with actual amount received, say 900 shares @ 5 each]

b. Accounting treatment by opening Calls-in-Arrears Account:

Call Money Due:

Share First Call A/c ...Dr.
To Share Capital A/c
[with actual amount due on say, 1000 shares @ 5 each]

Call Money Received:

Bank A/c ...Dr. [with actual amount received, say 900 shares @ 5 each]
Calls-in-Arrears A/c ... Dr. [with amount not received, 100 shares @ 5 each]
To Share First Call A/c

Disclosure in Balance Sheet: Calls-in-Arrears Account is shown in the Notes to Accounts on 'Share Capital'. This is shown as a deduction from the amount of 'Subscribed but not fully paid-up' under 'Subscribed Capital'.

ACCOUNTING TREATMENT OF CALLS-IN-ADVANCE:

JOURNAL ENTRY PASSED:

To record calls-in-advances:

Bank A/c ...Dr. [amount of calls money received in advance]
To Calls-in-Advance A/c

To adjust when the respective call is made due:

Calls-in-Advance A/c ...Dr.
To Respective Call A/c

SHARES ISSUED FOR CONSIDERATION OTHER THAN CASH

Entry is passed for:

a. PURCHASE OF AN ASSETS OR BUSINESS

Vendors against purchase of assets or business: Entry to be passed is as follows:

If shares are issued for purchase of assets:

Sundry Assets A/c (individually) ...Dr. (with the amount of purchase price)
To Vendor's A/c (with purchase consideration)

If shares are issued for purchase of business: When a business is purchased, both assets and liabilities are taken over for a consideration which can be equal to, more than or less than the difference between values of assets and liabilities. Entry to be passed in each of these cases is as follows:

if consideration is equal to the difference between the value of assets and liabilities:

Sundry Assets A/c (individually) ...Dr. (agreed value)
To Sundry Liabilities (individually) (agreed value)
To Vendor's A/c (purchase consideration)

if consideration is more than the difference between the value of assets and liabilities, such excess is debited to Goodwill Account:

Sundry Assets A/c (individually) Dr. (agreed value)

Goodwill A/c ...Dr. (excess consideration over net assets)

To Sundry Liabilities (individually) (agreed value)

To Vendor's A/c (purchase consideration)

if consideration is less than the difference between the value of assets and liabilities, such shortfall is credited to Capital Reserve Account:

Sundry Assets A/c (individually) ...Dr. (agreed value)

To Sundry Liabilities (individually) (agreed value)

To Vendor's A/c (purchase consideration)

To Capital Reserve A/c (excess of net assets over consideration)

Accounting Entries for issue of Shares to Vendors when Shares are:

Issued at par:

Vendor's A/c ...Dr. (nominal value of shares allotted)

To Share Capital A/c

Issued at premium:

Vendor's A/c ...Dr. (purchase consideration)

To Shares A/c (nominal value of shares allotted)

To Securities Premium Reserve A/c (premium amount)

Calculation of Number of Shares: When a business is purchased and consideration is paid in the form of issue of shares, number of shares is to be calculated as follows:

Number of Shares Issued = Purchase Consideration / Issue Price of Share

b. SERVICES TAKEN

Issue of Shares to Promoters: Such issue is made for services rendered by promoters for incorporating the company. Entry to be passed is as follows:

Amount due to Promoters

Incorporation Expenses or Preliminary Expenses A/c ...Dr.

To Promoter's A/c

(Amount due to promoters)

Issue of shares to Promoters

Promoter's A/c ...Dr.

To Share Capital A/c

(Issue of--- shares of Rs. --- each as fully paid to the promoters)

Issue of Shares to Underwriters: Such issue is made for services rendered by the underwriters where the underwriter agrees to take shares instead of charging commission in cash for his services rendered. Entry to be passed is as follows:

Amount due as Underwriting Commission

Underwriting Commission A/c Dr.

To Underwriters' A/c

Issue of shares to Underwriters

Underwriters' A/c Dr.

To Share Capital A/c

Disclosure in the Balance Sheet:

Shares issued for consideration other than cash are disclosed in the Balance Sheet under 'Subscribed Capital'. This may be further subscribed and fully paid or subscribed but not fully paid as the case may be and shown in Notes to Accounts under Share Capital.

FORFEITURE OF SHARES

Forfeitures of shares means cancelling the shares allotted to the shareholders. On cancellation, i.e., forfeiture of shares, amount received as share capital and securities premium is not refunded to the shareholders.

Forfeiture of Shares issued at Par:

Share Capital A/c Dr. (No. Of Shares forfeited x Called up value per share)

To Share Allotment A/c (Amount due but not paid on allotment)

To Shares Call A/c (Amount due but not paid on call)

Forfeiture of Shares issued at Premium: In this case, there are 2 possibilities:

Following entry is passed for forfeiture of shares:

To Share Allotment A/c (Amount not received on allotment)

To Shares Call A/c (Amount not received on calls)

To Forfeited Shares A/c (Amount received less premium)

Following entry is passed for forfeiture of shares:

Share Capital A/c Dr. (Called up value less premium)

Securities Premium Reserve A/c Dr. (Premium amount called-up but not received)

To Share Allotment A/c (Amount not received on allotment)

To Shares Call A/c (Amount not received on calls)

To Forfeited Shares A/c (Amount received less premium)

Where Calls in Arrears Account is maintained, Calls in Arrears Account will be credited instead of Shares Allotment A/c and Shares Calls Account.

Reissue of forfeited shares is not an issue of shares but is a sale of shares. Forfeited shares may be reissued (sold) on the terms as may decide by the company. Forfeited shares may be reissued by the company at par, at premium or at discount. For example, originally issued shares may have paid-up-value of ₹ 7,8,9 or even ₹ 10. However, discount allowed on reissued forfeited shares cannot be more than the amount forfeited on reissued shares.

a. When reissue is at par, i.e., nominal value of share:

To Share Capital A/c (amount credited as paid-up)

Bank A/c ...Dr. (amount received on reissue)

Forfeited Shares A/c...Dr. (discount allowed on reissue i.e., paid up value less reissue price)

To Share Capital A/c (amount credited as paid-up)

Bank A/c ... Dr. (amount received on reissue)

To Share Capital A/c (amount credited as paid up)

To Securities Premium Reserve A/c (excess amount received on reissue)

75

Accounting treatment of Balance in Forfeited Shares Account:

- a. **When all forfeited shares are reissued:** In this case, the balance left in Forfeited Shares Account is transferred to Capital Reserve as follows:

Forfeited Shares A/c ...Dr.

To Capital Reserve A/c

(Being the gain on reissue transferred to Capital Reserve)

- b. **When part of forfeited shares is reissued:** When part of the forfeited shares is reissued, gain on reissued shares is transferred to Capital Reserve Account.

Total amount forfeited x No. of shares reissued _ Reissue Discount
No. of shares forfeited

FORFEITURE OF SHARES UNDER PRO-RATA CATEGORY:

Following process is required to be followed when shares belonging to pro rata category are forfeited:

Calculate number of shares applied (if not given) by the shareholder whose shares are being forfeited:

(Shares Applied under Pro-rata Category) x Number of shares Allotted to shareholder/ Shares Allotted under Pro-rata Category

OR

Calculate total number of shares allotted (if not given):

(Shares Allotted under Pro-rata Category) x Number of shares Applied to shareholder/ Shares Applied under Pro-rata Category

Compute the total application money received on shares applied by defaulting shareholder as under:

No. of shares Applied by shareholder X Application money per share

Compute Application money due on shares allotted to defaulting shareholder as under:

No. of shares Allotted to shareholder X Application money per share

Determine the excess application money received:

Application Money received (Step2)- Application Money required (step 3)

Determine the amount due on allotment (by multiplying number of shares allotted by the amount of allotment money per share) and deduct from it the excess application money (Step 4)

The resultant amount is arrears on allotment.

CHAPTER-06: ACCOUNTING FOR DEBENTURES

MEANING OF DEBENTURES:

As per Section 2(30) of the Companies Act, 2013 “Debenture includes debenture stock, bonds and any other instrument of the company evidencing a debt, whether constituting a charge on the assets of the company or not.”

It is a written acknowledgement of debt being a Debenture Certificate issued by a company. Thus, debenture is borrowing of the company and the persons to whom debentures are issued are called Debenture holders.

FEATURES OF DEBENTURE:

S. No.	Feature / Characteristic	Description
i.	Debenture Certificate	Issued as a formal document known as a Debenture Certificate.
ii.	Acknowledgement of Debt	Serves as a formal acknowledgement of debt by the company.
iii.	Repayment Agreement	Involves an agreement between the company and its debenture holders fixing the mode and period of repayment for both the principal and interest.
iv.	Interest Rate Prefix	Commonly prefixed with the specific rate of interest (e.g., if the interest rate is 10%, it is titled '10% Debentures').
v.	Financial Classification	Treated as an external equity or long-term borrowing by the company.
vi.	Security of Funds	Usually secured by way of a charge on the assets of the company.
vii.	Accounting Treatment	The interest charged on debentures is considered a charge against profit.

BOND:

Bond is also an instrument of acknowledgement of debt. Traditionally, the Government issued bonds, but these days, bonds are also being issued by semi-government and non-governmental organisations. The terms 'debentures' and 'Bonds' are now being used interchangeably.

DIFFERENCE BETWEEN SHARES AND DEBENTURES:

BASIS	SHARES	DEBENTURES
Ownership & Capital	Represents ownership in the company; forms a part of the owned capital.	Represents an acknowledgement of debt; forms a part of the borrowed capital.
Return on Investment	Earns a dividend, which varies year-to-year based on company profits.	Earns a fixed interest rate that is predetermined at the time of issue.
Nature of Payment	It is an appropriation of profits (only paid if the company makes a profit).	It is a charge on profits (must be paid even if the company incurs a loss).
Repayment	Generally, not repaid during the lifetime of the company (except in buybacks or liquidation).	Repaid after a specified period as per the terms of the issue.
Voting Rights	Shareholders enjoy voting rights and can participate in management decisions.	Debenture holders do not enjoy voting rights in normal circumstances.
Security	Shares are never secured by any charge on the company's assets.	Debentures are generally secured by a fixed or floating charge over

		company assets.
Convertibility	Shares cannot be converted into debentures.	Debentures can be converted into shares if specified by the terms of issue.

TYPES OF DEBENTURES

ISSUE OF DEBENTURE:

A Company may issue debentures by public subscription or by private placement. the company may call the amount for debentures in lump sum or in instalments.

DEBENTURES MAY BE ISSUED:

FOR CASH	FOR CONSIDERATION OTHER THAN CASH	AS COLLATERAL SECURITY
Debentures issued for cash means amount is received by the company in cash or by cheque or a banking instrument against the debentures.	Issue of debentures for consideration other than cash means debentures are allotted against which consideration is received in kind such as services, assets purchased or business being taken over.	Collateral Security is security given in addition to the primary or principal security. Debentures may be issued to lenders as collateral security.

DEBENTURES, WHETHER ISSUED FOR CASH OR FOR CONSIDERATION OTHER THAN CASH, MAY BE ISSUED:

AT PAR	AT PREMIUM	AT DISCOUNT
Debentures issued at par means issue price of the debentures and nominal (face) value is same. For ex. If a Debentures of ₹100 is issued for ₹100.	Debentures issued at premium means issue price of the debentures is higher than its nominal (face) value. Premium amount may be received in lump-sum or in instalments. Unless specified otherwise, it is assumed to have been received along with allotment money. For ex. A debenture of ₹100 is issued for ₹110, ₹10 is premium.	Debentures issued at discount means issue price of the debentures is less than its nominal (face) value. Unless specified otherwise, discount is assumed to have been allowed on allotment. For ex. If a debenture of nominal (face) value ₹100 is issued for ₹95, it means debentures are issued at discount of ₹5.

CHAPTER-07: FINANCIAL STATEMENTS OF A COMPANY

Meaning

Financial statements are the formal annual reports through which the corporate management communicates financial information to its owners and various other external parties.

NATURE OF FINANCIAL STATEMENTS

Recorded Facts: Financial statements are prepared on the basis of facts in the form of cost data recorded in accounting books. The original cost or historical cost is the basis of recording transactions.

- Accounting Conventions: Certain accounting conventions are followed while preparing financial statements. For ex. The convention of valuing inventory at cost or market price, whichever is lower, is followed.
- Postulates: Financial statements are prepared on certain basic assumptions (pre-requisites) known as postulates such as going concern postulate, money measurement postulate, realization postulate etc.

Objectives of financial statement

1. To provide information about economic resources and obligations of a business.
2. To provide information about the earning capacity of the business.
3. To provide information about cash flows.
4. To judge effectiveness of management.
5. Information about activities of business affecting the society.
6. Disclosing accounting policies.

The financial statements generally include two statements:

- (1) Balance Sheet (2) Statement of Profit and Loss

(1) FORMAT OF BALANCE SHEET

Every company registered under The Companies Act 2013 shall prepare its balance sheet, in accordance with the manner prescribed in the revised Schedule III to the Companies Act, 2013. The format of balance sheet is as follows:

CHAPTER-08: ANALYSIS OF FINANCIAL STATEMENTS

MEANING:

The process of critical evaluation of the financial information contained in the financial statements in order to understand and make decisions regarding the operations of the firm is called 'Financial Statement Analysis'. In financial analysis, the data given in financial statements is classified into simple groups and a comparison of various groups is made with one another to pin-point the strong points and weakness of a business.

OBJECTIVES OF FINANCIAL STATEMENTS ANALYSIS 1. Assess Profitability Measures earning capacity and efficiency of the business. Helps determine whether the business is making adequate profits. 2. Evaluate Financial Position Examines liquidity and solvency. Indicates the firm's ability to meet short-term and long-term obligations. 3. Compare Performance Compares financial results of different years. Facilitates comparison with other firms in the industry. 4. Identify Strengths and Weaknesses Highlights areas of good performance and areas needing improvement. 5. Forecast Future Prospects Helps predict future growth, profitability, and financial stability. 6. Assist in Decision-Making Provides useful information to investors, Management, Creditors, Financial Institutions. Mnemonic: (P-F-C-S-F-D) ☐ P – Profitability ☐ F – Financial Position ☐ C – Compare Performance ☐ S – Strengths & Weaknesses ☐ F – Future Prospects ☐ D – Decision Making Mnemonic: "Profitable Firms Compare Strengths For Decisions."	IMPORTANCE OF FINANCIAL STATEMENT ANALYSIS 1. Importance to Management Helps in planning, controlling, and decision-making. Assists in evaluating operational efficiency. Identifies strengths and weaknesses of the business. 2. Importance to Investors Helps assess profitability and growth potential. Assists in making investment decisions. Indicates the safety of invested funds. 3. Importance to Creditors and Lenders Evaluates liquidity and solvency position. Helps determine the firm's ability to repay debts. 4. Importance to Government Useful for taxation purposes. Assists regulatory authorities in monitoring business performance. 5. Importance for Comparison and Forecasting Facilitates comparison between firms and across years. Helps identify trends in performance. Assists in forecasting future growth and profitability. Mnemonic: (M-I-C-G-C) ☐ M – Management ☐ I – Investors ☐ C – Creditors & Lenders ☐ G – Government ☐ C – Comparison & Forecasting Mnemonic: "Many Investors Carefully Gain Confidence."
Limitations of Financial Statement Analysis 1. Based on Historical Data Analysis is based on past information. Past performance may not always predict future results. 2. Ignores Qualitative Factors Does not consider factors such as: Employee efficiency, Management quality, Customer	Tools of Financial Statement Analysis 1. Comparative Statements Compare financial statements of two or more years. Show absolute and percentage changes. Help identify trends and growth patterns. 2. Common Size Statements Each item is shown as a percentage of a

satisfaction, Business reputation. 3. Different Accounting Policies Different firms may use different accounting methods. This reduces comparability between companies. 4. Affected by Price Level Changes Financial statements are generally prepared at historical cost. Inflation and changes in purchasing power are not fully reflected. 5. Possibility of Window Dressing Financial statements may be manipulated to present a better financial position. This can lead to misleading conclusions. 6. Limited Reliability Results depend on the accuracy of accounting records. Incorrect or incomplete data can affect analysis. Mnemonic: HIWPL H – Historical Data I – Ignores Qualitative Factors W – Window Dressing P – Price Level Changes L – Lack of Uniform Accounting Policies	common base. In Balance Sheet: percentage of total assets/liabilities. In Statement of Profit & Loss: percentage of net sales. Facilitates comparison among firms. 3. Ratio Analysis Studies relationships between different financial items. Measures: Liquidity Solvency Profitability Efficiency 4. Cash Flow Analysis Analyses inflow and outflow of cash. Assesses liquidity and cash management. Helps determine the firm's ability to meet cash obligations. Mnemonic: CCRC C – Comparative Statements C – Common Size Statements R – Ratio Analysis C – Cash Flow Analysis

Comparative Statement:

These are the statements showing the profitability and financial position of a firm for different periods of time in a comparative form to give an idea about the position of two or more periods. It usually applies to the two important financial statements, namely, balance sheet and statement of profit and loss prepared in a comparative form.

Comparative figures indicate the trend and direction of financial position and operating results. This analysis is also known as 'Horizontal or Dynamic Analysis'.

FORMAT OF COMPARATIVE STATEMENTS:

Particulars	Previous Year	Current Year	Absolute Change Increase (+) or Decrease (–)	Percentage Increase (+) or Decrease (–)
1	2 (₹)	3 (₹)	4 (₹)	5 (%)

Calculations:

Absolute Change = **Current Year – Previous Year**

Percentage Change = **(Absolute Change ÷ Previous Year) × 100**

Common Size Statements: These are the statements which indicate the relationship of different items of a financial statement with a common item by expressing each item as a percentage of that common item. **Common size statements are useful, both, in intra-firm comparisons over different years and also in making inter-firm comparisons for the same year or for several years. This analysis is also known as 'Vertical or Static analysis'**

FORMAT OF COMMON SIZE STATEMENT:

Particulars	Previous Year	Current Year	% Previous Year	% Current year
1	2 (₹)	3 (₹)	4 (%)	5 (%)

MCQ's (1 marks)

Q1	Assertion-(A): A single statement of profit and loss account does not convey anything about the progress or decrease/increase in the earnings of the business. Reason-(R): Therefore, it has no significance for the purpose of analysis. (a) Both (A) and (R) are correct and (R) is the correct reason of (A) (b) Both (A) and (R) are correct but (R) is not the correct reason of (A) (c) Only (R) is correct. (d) Both (A) and (R) are wrong
Q2	Assertion-(A): Common size statement of profit & loss facilitates the vertical analysis. Reason-(R): Since each accounting variable is expressed as percentage of Total of assets. (a) Both (A) and (R) are correct and (R) is the correct reason of (A) (b) Both (A) and (R) are correct but (R) is not the correct reason of (A) (c) Only (R) is correct. (d) Both (A) and (R) are wrong
Q3	Assertion (A): All contingent liabilities are shown in the non-current liabilities section of the balance sheet. Reason (R): A contingent liability refers to the claim which is uncertain to arise /which may or may not rise/which is dependent on a happening in future. (a)Both Assertion (A) and Reason (R) are true and Reason (R) is the correct explanation of assertion (A). (b)Both Assertion (A) and Reason (R) are true and Reason (R) is not the correct explanation of assertion (A). (c)Assertion (A) is true Reason (R) is False (d)Assertion (A) is False Reason (R) is True
Q4	When bad position of the business is tried to be depicted as good it is known as (a) Personal bias (b) Window dressing (c) Price level changes (d) None of these

CHAPTER-09: RATIO ANALYSIS

Meaning of Accounting Ratios:

- A ratio is a mathematical number calculated as a reference to relationship of two or more numbers and can be expressed as a fraction, proportion, percentage & a number of times.
- When the number is calculated by referring to two accounting numbers derived from the financial statements, it is termed as accounting ratio.
- Ratio analysis is a technique which involves regrouping of data by application of arithmetical relationships, though its interpretation is a complex matter.

Objectives of Ratio Analysis:

- To know the areas of the business which need more attention;
- To know about the potential areas which can be improved with the effort in the desired direction.
- To provide a deeper analysis of the profitability, liquidity, solvency and efficiency levels in the business;
- To provide information for making cross-sectional analysis by comparing the performance with the best industry standards;

Advantages of Ratio Analysis:

- * Helps to understand efficacy of decisions.
- * Identification of problem areas.
- * Simplify complex figures & establish relationships
- * Helpful in comparative analysis.
- * Enables SWOT analysis.

Limitations of Ratio Analysis

Limitation	
Historical Data	Past results may not predict future performance
Ignores Qualitative Factors	Non-financial aspects are not considered
Different Accounting Policies	Difficult comparison between firms
Price Level Changes	Inflation effects are ignored
Window Dressing	Ratios may become misleading
Limited Reliability	Depends on accuracy of accounting records

Mnemonic: "History and Wisdom Prevent Questionable Results." (H-A-W-P-Q-R)

Classification of Ratios

Category	Purpose
Liquidity Ratios	Ability to meet short-term obligations
Solvency Ratios	Long-term financial stability
Activity (Turnover) Ratios	Efficiency in using assets
Profitability Ratios	Earning capacity of the business

A. LIQUIDITY RATIO:

1. Current Ratio Formula: $\text{Current Ratio} = \frac{\text{Current Assets}}{\text{Current Liabilities}}$ Ideal ratio: 2: 1 Interpretation: Higher ratio indicates better short-term solvency.	2. Quick Ratio / Acid-Test Ratio Formula: $\text{Quick Ratio} = \frac{\text{Quick Assets}}{\text{Current Liabilities}}$ $\text{Quick Assets} = \text{Current Assets} - \text{Inventory} - \text{Prepaid Expenses}$ Ideal ratio: 1: 1 Interpretation: Measures ability to pay immediate liabilities without selling inventory.
---	---

***Loose tools and stores and spares are not included in inventories while calculating current ratio.**

B. SOLVENCY RATIOS:

(A) <u>Debt-Equity Ratio</u> Formula: Outsiders' Funds ÷ Shareholders' Funds Ideal ratio: 2 : 1 Interpretation: Lower ratio generally means lower financial risk. Debt=Long term borrowings+ long term provisions Shareholders' Funds = Equity Share Capital + Preference Share Capital + Reserves & Surplus	(B) <u>Proprietary Ratio</u> Formula: Shareholders' Funds ÷ Total Assets Interpretation: Shows proportion of assets financed by owners. Shareholders' Funds = Equity Share Capital + Preference Share Capital + Reserves & Surplus	(C) <u>Interest Coverage Ratio</u> Formula: EBIT ÷ Interest Where EBIT = Earnings Before Interest and Tax Interpretation: Higher ratio indicates better ability to pay interest
(D) <u>Total Assets to Debt Ratio:</u> Formula: Total Assets /Debt Interpretation: Higher ratio shows larger safety margin for lenders. Total assets= Non-current Assets +Current assets	(E) <u>Debt to Capital Employed Ratio:</u> Formula: Long-term Debt/Capital Employed (or Net Assets)	Points To Remember *Use long term debts in calculating these ratios not Total debt. Total Debt=Long Term Debt(Debt)+Current Liabilities (Short term Debt)

C. ACTIVITY/ TURNOVER RATIOS:

A. <u>Inventory Turnover Ratio</u> Formula Inventory Turnover Ratio = Cost of Revenue from Operations / Average Inventory Average Inventory = (Opening Inventory + Closing Inventory) / 2 Interpretation: Higher ratio indicates efficient inventory management	B. <u>Trade Receivables Turnover Ratio</u> Formula Trade Receivables Turnover Ratio = Net Credit Revenue from Operations / Average Trade Receivables Interpretation: Higher ratio means faster collection from debtors.	C. <u>Trade Payables Turnover Ratio</u> Formula Trade Payables Turnover Ratio = Net Credit Purchases / Average Trade Payables Interpretation: Indicates speed of payment to creditors.
--	--	---

D. <u>Working Capital Turnover Ratio</u> Formula Working Capital Turnover Ratio = Revenue from Operations / Working Capital Working Capital = Current Assets – Current Liabilities Interpretation: Measures efficiency of working capital usage.	E. <u>Fixed assets Turnover ratio:</u> Formula Fixed assets Turnover ratio= Revenue from Operations / Net fixed assets Net fixed assets=Gross fixed Assets-Depreciation Interpretation: Measures efficiency of Fixed assets in generating revenue.	F. <u>Net Assets or Capital Employed Turnover Ratio:</u> Formula: Net Assets Turnover Ratio= Revenue from Operations / Capital employed.
---	--	--

D. PROFITABILITY RATIOS:

A. Gross Profit Ratio Formula Gross Profit Ratio = (Gross Profit / Revenue from Operations) × 100 Interpretation: Shows gross earning capacity.	B. Operating Ratio Formula: Operating Ratio = (Cost of Revenue from Operations + Operating Expenses) / Revenue from Operations × 100 Interpretation: Lower ratio is generally better	C. Operating profit ratio Formula Operating profit ratio= (Operating Profit / Revenue from Operations) × 100 Operating Profit=Revenue from Operations–Operating Cost
---	--	--

D.Net Profit Ratio Formula: $\text{Net Profit after Tax} \div \text{Revenue from Operations} \times 100$ Interpretation: Indicates overall profitability.	E. Return on Investment (ROI) / Return on Capital Employed (ROCE) Formula: $\text{ROCE} = \frac{\text{EBIT}}{\text{Capital Employed}} \times 100$ $\text{Capital Employed} = \text{Total Assets} - \text{Current Liabilities (or Shareholders' Funds + Long-term Debt)}$ Interpretation: Measures return generated on total long-term funds employed.	POINT TO BE REMEMBERED: *Operating ratio + Operating profit ratio=100 * Exclude fictitious assets (preliminary expenses, debit balance of P&L, etc.) from total assets *Profit before Tax=Profit after tax $\times 100 / 100 - \text{Rate of tax}$.
---	--	--

POINTS TO REMEMBER: In board exams, formula, calculation & interpretation each carry marks. Always write the formula first, substitute values clearly & conclude with a one-line interpretation (If asked)

MCQ's (1 marks)

Q1	Assertion(A) – Ratio analysis is a process of determining and interpreting relationships between the items of financial statements to provide meaningful understanding of the performance and financial position of an enterprise. Reason(R) – It is a technique of analyzing the financial statements by computing the various ratios. (a) Both (A) and (R) are true and (R) is the correct explanation of (A). (d) Both (A) and (R) are true and (R) is not the correct explanation of (A). (c) (A) is true, but (R) is false (d) (A) is false, but (R) is true.

Q5	The debt equity ratio of a company is 1:1 state giving reasons, which of the following would improve, reduce or not change the ratio (i) Purchase of goods on credit (ii) Sale of goods at a profit (iii) Redemption of debentures at a premium	3

ANSWERS (3 MARKS QUESTIONS):

Ans1	Net Profit before tax = Net profit after tax × 100/ (100 – Tax rate) = ₹60,000 × 100/ (100 – 40) = ₹1,00,000 Interest on Long-term Debt = 15% of ₹10,00,000 = ₹1,50,000 Net profit before interest and tax = Net profit before tax + Interest = ₹1,00,000 + ₹1,50,000 = ₹2,50,000 Interest Coverage Ratio=Net Profit before Interest & Tax/Interest on long-term debt = 2,50,000/1,50,000= 1.67 times
Ans2	Inventory Turnover Ratio = Cost of Revenue from Operations / Average Inventory Cost of Revenue from Operations = Inventory in the beginning + Net Purchases + Wages + Carriage inwards – Inventory at the end = ₹18,000 + Rs. 46,000 + ₹14,000 + ₹4,000 – ₹22,000 = ₹ 60,000 Average Inventory = Inventory in the beginning + Inventory at the end / 2 = ₹18,000 + ₹22,000/ 2 = ₹20,000 ∴ Inventory Turnover Ratio = 60,000/ 20,000 = 3 Times
Ans3	(i) Not change: Simultaneous decrease in both current assets and current liabilities will not affect the quick ratio. (ii) Not change: Debentures converted into shares do not affect either quick assets or current liabilities. Therefore, quick ratio will not be affected (iii) Decrease: Liquid assets remained unchanged but current liabilities are increased
Ans4	Return on Investment=Net profits before interest and tax/Capital employed*100 =1,65,000/8,00,000 × 100=20.625% Net profit before tax=100000x 100/100-20=₹1,25,000 Net profits before interest and tax=1,25,000+40000(10% @4,00,000) = ₹1,65,000 Capital Employed= Total asset - Current liabilities=10,00,000-2,00,000=₹ 8,00,000
Ans5	(i) No change: Neither the long-term debt nor the shareholders' funds are affected by purchase of goods on credit. (ii) Reduce: Shareholders' funds are increased by the amount of profit on sale of goods, but the long-term debts remain unchanged. (iii) Reduce: Redemption of debentures will reduce the long-term debts, but shareholders' funds remain unchanged.

(i) Obtained a loan from bank ₹ 2,00,000 payable after five years. (ii) Purchased machinery for cash ₹ 75,000 (iii) Redeemed 5% redeemable preference shares ₹ 1,00,000. (iv) Issued equity shares to the vendors of machinery purchased for ₹ 4,00,000.	4

ANSWERS (4 MARKS QUESTIONS)

Ans1	Current Assets = Liquid Assets + Inventories (excluding loose tools) + Prepaid Exp = ₹ 75,000 + ₹ 15,000 + ₹ 10,000 = ₹1,00,000 Working Capital = Current Assets – Current Liabilities Current Liabilities = Current Assets – Working Capital = ₹1,00,000 – ₹60,000 = ₹40,000 Current Ratio = $\frac{\text{Current Assets}}{\text{Current Liabilities}}$ = ₹ 1,00,000 / ₹ 40,000 = 2.5:1 Liquid Ratio = Liquid Assets / Current Liabilities = ₹ 75,000 / ₹ 40,000 = 1.875 : 1
Ans2	Trade Receivables Turnover Ratio = Credit Revenue from Operations / Average Trade Receivables = 6,00,000/1,50,000 = 4 times Revenue From Operations = Cost of Revenue from Operations + Gross Profit = 6,00,000 + 1,50,000 = 7,50,000 Cash Revenue from Operations = 20% of Revenue From Operations = 20% of 7,50,000 = 1,50,000 Credit Revenue from Operations = Revenue from operations – Cash Revenue from operations = 7,50,000 – 1,50,000 = 6,00,000 Average Trade Receivables = (Opening Trade Rec. + Closing Trade Rec.) / 2 = (1,00,000 + 2,00,000)/2 = 1,50,000
Ans3	(i) No change: As both purchase and closing stock will increase, so there will be no effect on cost of goods sold. (ii) Increase: As wages paid will increase the operating cost. (iii) No change: As redemption of debentures is a non-operating activity. (iv) Decrease: As goods sold will increase the net sales
Ans4	(i) Gross Profit Ratio = Gross Profit/Revenue from Operations*100 = 57000/4,00,000*100 = 14.25% Net Purchases = 80% of Revenue from Operations = 4,00,000 × 80/100 = ₹ 3,20,000 Cost of Revenue from Operations = Opening Inventory + Net Purchases + Direct

	Expenses – Closing Inventory $= 10,000 + 3,20,000 + 20,000 - 7,000 = ₹ 3,43,000$ 'Gross Profit = Revenue from Operations – Cost of Revenue from Operations $= 4,00,000 - 3,43,000 = ₹ 57,000$ (ii) Debt equity ratio = Debt / Equity = $5,50,000 / 11,00,000 = 0.5:1$ Long-term Debts = 9% Debentures + Long-term Loan from Bank $= 4,00,000 + 1,50,000 = ₹ 5,50,000$ Shareholders' Funds = Equity Share Capital + 8% Preference Share Capital $= 8,00,000 + 3,00,000 = ₹ 11,00,000$
Ans5	(i) Decrease: Loan obtained from bank will increase the total assets but the shareholders' funds will remain the same, so proprietary ratio will decrease. (ii) No change: Machinery purchased for cash will increase and simultaneously decrease the total assets therefore proprietary ratio will remain unchanged. (iii) Decrease: Redemption of preference shares will decrease total assets and shareholders' funds simultaneously, so proprietary ratio will decrease. (iv) Increase: Machinery purchased by issue of equity shares will increase total assets and shareholders' funds simultaneously, so proprietary ratio will increase

CHAPTER-10: CASH FLOW ANALYSIS

Cash flow statement shows inflows and outflows of cash and cash equivalents from operating, investing and financing activities of an enterprise during a particular period. Inflows are those transactions that increase the cash and cash equivalents and outflows are those transactions that decrease the cash and cash equivalents.

Objectives of Cash Flow Statements: -

- To ascertain the sources of cash and cash equivalents under operating, investing & financing activities by the enterprise.
- To ascertain the applications of cash and cash equivalents under operating, investing & financing activities by the enterprise.
- To ascertain net change in cash and cash equivalents being the difference between inflows & outflows under operating, investing and financing activities of the enterprise that take place between the dates of two balance sheets.

Importance/Benefits/Uses of Cash Flow Statements: -

- a. Facilitates in Ascertaining Cash Flow from operating, investing & financing activities.
- b. To assess Liquidity and Solvency.
- c. To manage Cash Efficiently.
- d. Facilitates Capital Budgeting Decisions.

Procedure of Preparing Cash Flow Statements: -

- The Institute of Chartered Accountants of India has issued Accounting Standard AS-3 Revised, for preparing a cash flow statement.
- According to AS-3 Revised, the cash flow statement summarizes the cash inflow & cash outflows and the net changes (increase or decrease) in cash and cash equivalents resulting from operating, investing and financing activities of a firm during a period

The following terms are used for preparing a cash flow statement:

Cash: It comprises cash in hand and demand deposits with banks i.e., deposits which are repayable by banks on demand.

Cash Equivalents: Cash Equivalents are short-term, highly liquid investments having an original maturity of three months or less and readily convertible into known amounts of cash. In simple words Cash and Cash Equivalents includes: -Cash in Hand, Cash at Bank, Cheque and Drafts on Hand, Current/Short-term Investments, Marketable Securities,

Classification of Cash Flows for Cash Flow Statement

As per **Accounting Standard (AS)-3 (Revised)**, a Cash Flow Statement requires all inflows and outflows of cash and cash equivalents during an accounting period to be classified according to the nature of activities.

The cash flows are classified into the following three categories:

1. Operating Activities
2. Investing Activities
3. Financing Activities

1. Operating Activities

Operating activities are the principal revenue-generating activities of an enterprise and other activities that are not investing or financing activities.

Cash Flows from Operating Activities

(A) In Case of Non-Finance Companies

Cash Inflows	Cash Outflows
Cash sales	Cash purchases
Cash received from Trade Receivables	Payment to Trade Payables
Royalty received	Payment of operating expenses
Fees received	Payment of wages and salaries
Commission received	Income Tax paid*
Income Tax Refund*	

(B) In Case of Finance Companies

Cash Inflows	Cash Outflows
Interest received	Payment of interest
Dividend received	Purchase of securities held for sale
Proceeds from sale of securities held for sale	
Brokerage received by a stock broker	

Income Tax paid is generally shown net of Income Tax Refund unless it can be specifically identified with investing or financing activities.

2. Investing Activities

Investing activities relate to the acquisition and disposal of long-term assets and investments. (For non-financial enterprises, Interest Received and Dividend Received are generally classified as Investing Activities as per CBSE syllabus.)

Cash Inflows	Cash Outflows
Proceeds from sale of Fixed Assets	Purchase of Fixed Assets
Proceeds from sale of Non-Current Investments	Purchase of Non-Current Investments
Interest received on Investments	Brokerage paid on purchase of Investments
Dividend received	
Rent received from property held as Investment	

3. Financing Activities

Financing activities are activities that result in changes in the size and composition of the owners' capital and borrowings of the enterprise.

Cash Inflows	Cash Outflows
Proceeds from issue of Equity Shares	Repayment of Long-term Loans
Proceeds from issue of Preference Shares	Redemption of Preference Shares
Proceeds from issue of Debentures	Buy-back of Equity Shares
Proceeds from Long-term Borrowings	Payment of Dividend
Increase in Bank Overdraft/Cash Credit	Payment of Interest
	Brokerage or Underwriting Commission paid on issue of Shares or Debentures
	Decrease in Bank Overdraft/Cash Credit

Transactions Not Regarded as Cash Flows: These transactions merely represent movements between items constituting Cash and Cash Equivalents and, therefore, are not considered cash flows

Examples
Cash deposited into Bank
Cash withdrawn from Bank
Purchase of Marketable Securities out of Cash Equivalents
Sale of Marketable Securities treated as Cash Equivalents

Non-Cash Transactions: - Non-cash transactions do not involve any inflow or outflow of Cash or Cash Equivalents and are therefore excluded from the Cash Flow Statement.

Examples of Non-Cash Transactions
Depreciation on Fixed Assets
Amortisation of Intangible Assets
Writing off Preliminary Expenses
Conversion of Debentures into Equity Shares
Acquisition of Assets by Issue of Shares

Acquisition of Assets by Issue of Debentures

Summary of Classification

Activity	Meaning	Examples
Operating Activities	Principal revenue-generating activities of the business	Cash sales, cash purchases, wages, operating expenses
Investing Activities	Acquisition and disposal of long-term assets and investments	Purchase/sale of fixed assets and investments
Financing Activities	Activities affecting capital and borrowings	Issue/redemption of shares and debentures, repayment of loans, dividend paid

Q17. Valuation of Goodwill

(i) Capitalisation of Super Profits Method:

[1/2 Mark]

- Capital Employed = Assets - External Liabilities = ₹60,00,000 - ₹20,00,000 = ₹40,00,000
- Normal Profit = Capital Employed x (NRR/100) = ₹40,00,000 x (10/100) = ₹4,00,000 [1/2 Mark]
- Super Profit = Average Profit - Normal Profit = ₹8,00,000 - ₹4,00,000 = ₹4,00,000 [1/2 Mark]
- Goodwill = (Super Profit x 100) / Normal Rate of Return = (₹4,00,000 x 100) / 10 = ₹40,00,000 [1/2 Mark]

(ii) Super Profit Method (At 4 years' purchase):

- Goodwill = Super Profits x Number of years purchase

- Goodwill = ₹4,00,000 x 4 = ₹16,00,000
